EDUCATION AND TRAINING

Carnegie Mellon University, Heinz College
Chief Information Security Officer (CISO) Certificate
AWS Certified Cloud Practitioner (CCP)

2021

2022

EXPERIENCE

Plasmidsaurus

August 2025–Present

Infrastructure and Security Lead

- Standardized office networks across five office sites in three countries, implementing SD-WAN, hierarchical network topologies as IaC, and site-to-site VPN.
- Migrated existing production EC2 instances to continuously deployed ECS services, maintaining IaC and deployment pipelines for the company's core product.
- Wrote and implemented policies for SOC 2, moving the company from zero-policy to completing audit observation within six months.

Tau Motors

October 2023–August 2025

Business Operations Lead — IT, Information Security, DevOps

- Ported all existing cloud infrastructure to continuously deployed Terraform configurations.
- Increased Terraform module test coverage from 0–100% in under six months, and maintained 100% coverage in perpetuity.
- Implemented CI/CD pipelines via GitHub Actions for software testing, Terraform-managed cloud infrastructure, and on-premise hardware tests.
- Migrated existing on-premise Windows 10 server infrastructure to Ansible-managed Debian environment.
- Migrated single-site non-hierarchical Sonicwall network to segmented local area networks, spanning multiple IPsec-connected offices with active load-balancing and highly available gateways.
- Authored and implemented information security policies in order to achieve TISAX ISMS certification in under seven months.
- Implemented MDM, IdP, and EDR, bringing previously unmanaged accounts and systems under management in compliance with new security requirements.

Prime Trust

September 2019–October 2023

Director of Information Technology

- Wrote custom software to automate hardware inventory lifecycle management and helpdesk reporting.
- Worked with executive officers to design, and coordinate the construction of, a 40-thousand square foot office space, deploying multiple Crestron conferencing systems and a Cisco Meraki LAN.
- Reduced operational expenditures by migrating existing IdP, password manager, file server, and payroll systems supporting 500+ employees to new services in under six weeks without disrupting business operations.
- Hardened and brought end-user Linux devices under management via Ansible in compliance with information security policy and CIS benchmarks.
- Provided 24/7 on-call service to executive officers for both IT systems and security incident remediation.

Platform Engineer

- Assisted in migrating legacy business infrastructure from Heroku to EKS.
- Worked with Product and Engineering teams to manage production deployments and releases in line with the company SDLC.
- Assisted as subject-matter expert in relevant IT and cryptography domains during ISO and SOC certifications and audits.
- Wrote internal tooling and automation to improve velocity across SRE and Engineering teams.
- Ported third-party EDR software to provide compatibility with previously unmonitored employee Linux endpoints.

System Administrator

- Migrated existing Fortigate hardware to Cisco Meraki appliances with no network downtime during business hours.
- Reduced network penetration test findings by 80% after initial engagement.
- Migrated Active Directory MDM, password manager, and payroll systems to cloud-based services.
- Wrote, implemented, and provided subject-matter expertise in information security policies, assisting the company in achieving both ISO 27001 and SOC 2 certifications.

TECHNICAL SKILLS AND EXPERTISE

- **Systems and Languages.** Linux (RHEL, Debian, Alpine), FreeBSD, Python, HCL, shell (bash/sh).
- **Networking and Cloud.** AWS, Azure, Heroku, pfSense, Cisco Meraki, Fortigate, MikroTik.
- **Policy and Certification.** ISO 27001, SOC 2, TISAX.
- **Containerization, SCM, Configuration Management.** Docker, git, GitHub Actions, Ansible, Terraform.
